

INTRODUCTION

The quality of ELUS is not only due to its excellent functional design, but also from advanced manufacturing techniques and global supply chain. The application of fully automatic intelligent manufacturing enhances quality further, improves accuracy and stability of products, bringing ongoing reliable user experiences for customers.

The first process of ELUS production- pouring

Automatic CNC machining centers to ensure high precision of inner structure.

Robotic polishing to guarantee a perfect finish on product

Automatic plating lines to ensure the stability of ELUS stunning chrome finish along with other colorful surface finishes such as brushed nickel, matt black, luxury gold, and oil-rubbed bronze.

The high-end quality of ELUS benefits from the control of assembly details.

All products are water tested under both high and low water pressure.

FINISH TECHNOLOGY

ELUS gives products with diversity by mature plating technology. Polished Chrome, Luxury Gold, ORB, Matt Black and Brushed Nickel, each finish stands for a kind of life style, fashion and character. Meanwhile, it also represents the exploring for the fashion value of water.
