Leaf shadow

叶影

其设计灵感源于大自然中树叶的灵动形态。吊灯的造型仿若茂密枝叶间错落垂下的叶片，每一片都精雕细琢，叶脉清晰可见，纹理细腻，似在无声诉说着岁月的故事与自然的奥秘。当灯光亮起，那柔和的光线透过叶片的缝隙倾洒而下，在墙面上、地面上交织出一片片斑驳陆离的光影，宛如阳光透过树叶的间隙在林间地面投下的金色光斑，随着微风的轻拂，光影摇曳生姿，似有若无的动态效果，让整个空间瞬间充满了生机与活力。

Its design inspiration comes from the dynamic form of leaves in nature.
The shape of the chandelier resembles the scattered leaves hanging from the dense branches and leaves,
Each piece is meticulously crafted, with clear and visible veins and delicate textures,
It seems to silently tell the stories of time and the mysteries of nature. When the light is on,
The soft light poured down through the gaps in the leaves, interweaving patchy shadows on the walls and floors,
Like golden spots of sunlight shining through the gaps of leaves on the ground in the forest, with the gentle breeze,
The flickering light and shadow create a dynamic effect that seems elusive, instantly filling the entire space with vitality and energy.

Water drop

水滴

具有良好的光学特性,当光线照射到水滴上时,会发生折射和反射现象

这也是为什么我们能在雨后看到彩虹的原因之一

阳光进入水滴后,由于水滴与周围空气的折射率不同,光线在水滴内部发生折射,

然后在水滴的内表面又发生反射,经过多次折射和反射后,

不同颜色的光按照一定的顺序分离出来,形成了美丽的彩虹

It has good optical properties, and when the light shines on the water droplets, it will be refracted and reflected

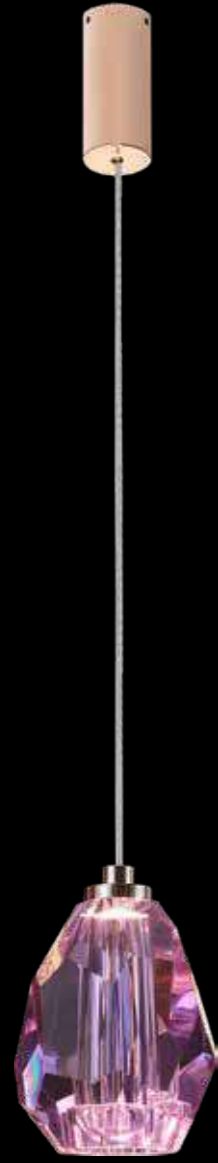

Is that one of the reasons why we see rainbows after rain

After sunlight enters the water drop, the light is refracted inside the water drop because the water drop has a different refractive index than the surrounding air,

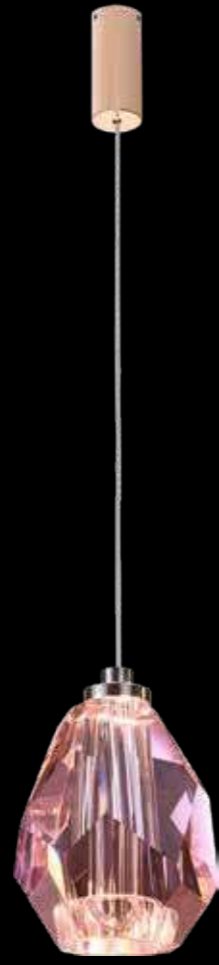

Then reflections occur on the inner surface of the water drop, and after many refractions and reflections,

The different colors of light are separated in a certain order to form a beautiful rainbow

 还有的可能是几只小蜜蜂围绕着一个中心呈聚集状,
 就像它们在蜂巢周围活动时的场景,给人一种生动活泼的感觉。

This type of chandelier is usually based on the overall shape of one or more small bees.
 For example, some chandeliers show a little bee spreading its wings about to fly,
 Its body is round and full, and its head is raised slightly, as if seeking the direction of the nectar.
 Or maybe a few little bees clustered around a center,
 It is like the scene when they move around the hive, giving people a lively feeling.
